

Become Energy Efficient and SAVE!

TASOL is the first company to have a SABS tested **Retrofit flange!**

-**Upgrade** your current electric **Kwikot** geyser to a **TASOL** solar water heating system, and qualify for an **Eskom Rebate!** *

The **Retrofit Flange** is a unique offering that converts your existing electrical geyser to a **Solar Water Heating System**.

- Two additional water ports** allows for a dedicated solar loop.
- The retrofit will **not affect the balance of the manufacturer's warranty** on the geyser.
- Retrofit includes **new element & thermostat**
- Uses a **circulation pump** that can operate **independently from electricity supply**
- Get a **Geyser Wise Controller** to control the electricity used to heat water
- Low maintenance required** for direct evacuated tube collectors (no glycol replacements)
- Split system** - Geyser inside the roof, no tank outside

SA is ideally situated to exploit the **sun's energy** - **Save up to 60%** on your hot water electricity bill!
